Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 27, 29, 43, and 50 drawn to electronic shopping presentation of image, classified in class 705, subclass 27.
- II. Claims 1-2, 4-28, 30-49, and 51-54 drawn to application of database or data structure (e.g. distributed, multimedia, image) classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the presentation for online shopping of a product has separate utility such as displaying to the user multimedia information.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for

Art Unit: 3625

Group I is not required for Group II, restriction for examination purposes as indicated is proper.
